BUILD

TOMORROW

HELLO TOMORROW

"At Hello Tomorrow, our mission is to identify and transform innovations into world-changing solutions for major industrial and societal problems.. We connect entrepreneurs, investors, industries and scientists. We create and foster this global interdisciplinary community through 3 key actions.:

First, we highlight innovators in worldwide events focused on local challenges and expertise

Second, we propel the most promising science & tech projects through our global early-stage startup competition.

Finally, we organize an annual global summit to gather the most inspiring innovators under one roof."

Xavier Duportet, President

WORLDWIDE EVENTS

Our international events highlight local disruptive technologies that will shape the future and solve societal and industrial problems. We guide local innovators through the journey required to transform these technologies into impactful products and services.
